APPENDICES	63	
Appendix A	64	Updated to include current process and to increase transparency. Removed SDAC from selection process.

		Rationale: While the SDAC was removed from within the selection process, they will continue to be consulted to ensure the process aligns with necessary priorities, values and policies.
Appendix B	66	Added conditional approval to 3 layers of padding in competition for level 4 padding. Rationale: Level 4 padding is required at national events in rinks where these events are not routinely held. Working with PTSO's and clubs to ensure they can maximize the use of their current padding, reduce costs (new purchases) and ensure the safety of the participants. Promotes development of the sport by increasing the viability of these events in new locations.
